CROSSWALKS / STREET CROSSINGS

OBJECTIVE
Pedestrian safety is the primary concern in designing and managing street crossings. Crossings that are safe, easy to use and well-marked support active, pedestrian-friendly environments and link both sides of the street physically and visually.
CROSSWALKS / STREET CROSSINGS GOALS

1. Appropriately locate street crossings in response to the anticipated traffic flow and convenience of the pedestrian.

2. Provide for pedestrian safety and comfort.

3. Increase the level of caution of pedestrians and motorists.

4. Create a link between the two sides of the street or mark a block’s mid-point or end-point.

5. Ensure crosswalks are in compliance with Departments of Transportation and Public Works regulations.
